A financial analysis of Rhonda HUTSON was conducted by Special Agent Trevor McMurray, IRS. As it has been established within this affidavit, Rhonda HUTSON started a business called Mid-South Seamless Guttering for the purpose of covering up all the drug traffic coming to and from her residence. Bank records were obtained for accounts in the name of Mid-South Seamless Guttering. From October 2006 until March 2009, there was in excess of \$275,000 deposited in to the bank account of Mid-South Seamless Guttering at The First Bank and Trust Company. During this same time frame, \$244,000 was spent out of the account.

Upon further analysis of the deposits, it appears there were a few cash deposits, but the majority of these deposits were what appear to be customer checks. It appears there are

legitimate business deposits into this account, however, it appears there are very few disbursements that are business related. Most of the expenditures appear to be personal in nature. Rhonda HUTSON paid several credit card companies out of this account none of which were in the name of Mid-South Seamless Guttering. There were various car payments, motorcycle payments in nominee names, retail store credit cards, medical services, vacation services, etc.

The chart below represents disbursements out of the Mid-South Seamless Guttering Account that are to individuals known to be involved in the trafficking of illegal narcotics, or that are personal in nature and not associated with any legitimate known business purpose:

Cash Disbursements out of the account	\$29,615.00
Johnny Stiltner	\$ 5,880.00
Rhonda Hutson	\$ 7,252.00
Randall Cross	\$ 4,060.10
Tri-Cities Center for Cosmetic Dentistry	\$ 3,500.00
Blue Green Resorts	\$ 4,560.05
Harley Davidson (Account in Nominee Name)	\$ 5,400.00
Bob, Bob White, Bob Light	<u>\$ 5,200.00</u>
Various Disbursements	<u><u>\$65,467.15</u></u>

It is common for individuals involved in the trafficking of illegal narcotics to engage in unexplained financial transactions. It is also common for them to engage in financial transactions dealing with cash only. This type of activity is consistent with the banking activity associated with this particular bank account. Although it appears the deposits may be legitimate, the disbursements are personal in nature. It is probable that the payment for supplies and materials to conduct the business are being paid for with cash.

Upon analysis of Rhonda HUTSON's income tax records via Ex-Parte order, it was found that in 2006 she filed an individual 1040 with a Schedule C for Mid-South Seamless Guttering. She showed total income of \$34,481 with Cost of Goods Sold \$23,189. The net income from operating the business was \$9,362. According to the Internal Revenue Service data base, Rhonda HUTSON has not filed any returns for 2007 or 2008.

According to that same Internal Revenue Service database, Rhonda HUTSON received \$31,510 in 1099's from other contractors \$35,188 for 2007 and \$22,504 for 2008. During 2007, R. HUTSON deposited \$89,622.53 into her business checking account and in 2008, she deposited \$130,078.19.

Based on the financial institution and tax records analysis, and information received from associates, it appears that Rhonda HUTSON started Mid-South Seamless Guttering, not for the purpose of running a legitimate business, but for covering up her drug activity.

A criminal history check on Rhonda HUTSON revealed the following arrests: 1988 – Shoplifting; 1995 – Possession of Marijuana for Resale; 2001 – (TN) Possession of Controlled Substance, Possession of Marijuana for Resale, Tampering with Evidence, (VA) Manufacture, Sale, Possession of a Controlled Substance (Cocaine); 2004 – Aggravated Assault.

Cooperating Sources

Throughout this affidavit your affiant will identify several individuals by name and several as Cooperating Sources (CS) which were interviewed during this investigation. Your affiant believes the information provided by them, and included in this affidavit, to be credible and reliable for the following reasons: the debriefings included statements against their own penal interest, the information provided by them matched information received from other sources, and much of this information was confirmed by other investigative methods. Some of these methods included surveillances and records acquired during the investigation, including records of phone calls between the co-conspirators.

CS' are utilized for several reasons: a CS might be a member of the target organization and therefore have easy access to information needed by law enforcement; a CS might have a relationship with members of the target organization, making it easy to purchase and/or locate illegal substances, profits, etc.; and in many situations a CS provides to law enforcement the opportunity to infiltrate an organization when all other means are exhausted.

CS-2, CS-3, CS-6, CS-7, CS-8, CS-11, CS-12, CS-14, CS-15, CS-17, CS-18, CS-19, CS-20, CS-22, CS-23, CS-24, CS-25, CS-27, CS-28, CS-29, CS-30, CS-31, and CS-33 were all arrested for violations of the law, most of which were drug distribution charges. The CS' provided information on other crimes, including drug traffickers, in return for consideration for reduced sentences.

CS-1, CS-16, CS-21, CS-32 and CS-34 provided information to law enforcement in return for consideration for charges which had not yet been brought against them.

CS-4, CS-5, CS-9 and CS-13 cooperated with law enforcement in return for monetary compensation, making undercover purchases of narcotics which led to successful prosecutions. CS-9 is now deceased.

CS-10 cooperated with law enforcement and received no compensation.

Telephone Toll Analysis

Based on my training and experience, I know the following: Distributors of narcotics, including but not limited to cocaine and OxyContin, communicate extensively by the use of

cellular telephones. These cellular telephone are often in the names of other people or non-existent persons with fraudulent addresses to avoid law enforcement detection. Drug distributors often change cellular telephones and/or cellular telephone numbers to further avoid detection by law enforcement.

Throughout this investigation, agents utilized Administrative Subpoenas and Court Orders to gather subscriber information and toll records on the Shannon HUTSON Drug Trafficking Organization. Although the subscriber information was inaccurate and incomplete in some cases, agents were able to identify the users through various means (debriefings, surveillance, search warrants, arrests, etc.). The collection of toll records also presented a challenge as many cellular telephone numbers were changed throughout the investigation. The information received from the telephone companies was accurate, however was not complete because of the time lost while tracking down new cellular telephone numbers. The frequencies listed in this affidavit are accurate based upon the information received by law enforcement. The information received allowed agents to further link specific events to the organization, and also allowed agents to discount certain events that were not relevant to the overall conspiracy.

I declare under the penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed on January 11, 2010, at Abingdon, Virginia.
